

VIVA: VISIBILITY FOR VACCINES

A tool that visualizes the pipeline of vaccine orders and forecasts, so country governments can identify future stock-outs or overstocking.

WHY DOES VIVA MATTER?

65 countries

reported a national level

stock-out

of at least one vaccine and for at least one month in 2015

Poor Planning

36%

Percentage of stock-outs that were due to delays in funding from 2011-2016

Delays in Funding

6-24

Number of months from time demand is confirmed and vaccine is delivered

Sources: WHO GVAP 2016, UNICEF Supply Division (SD)

WHAT IS VIVA?

A planning tool that can help countries with their procurement planning and forecasting

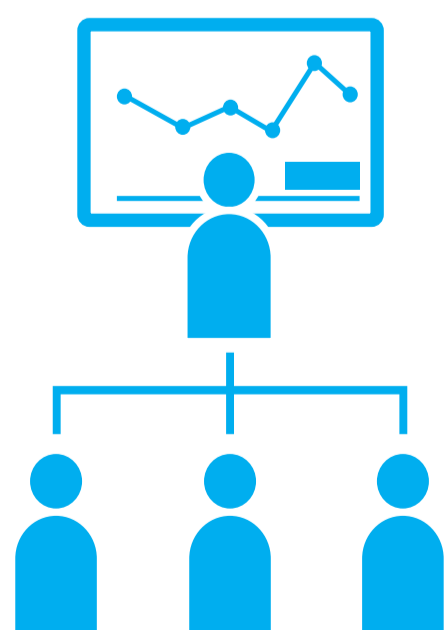

An online platform that can alert countries to potential stock-outs or overstocking

An advocacy tool that can facilitate timely funding decisions

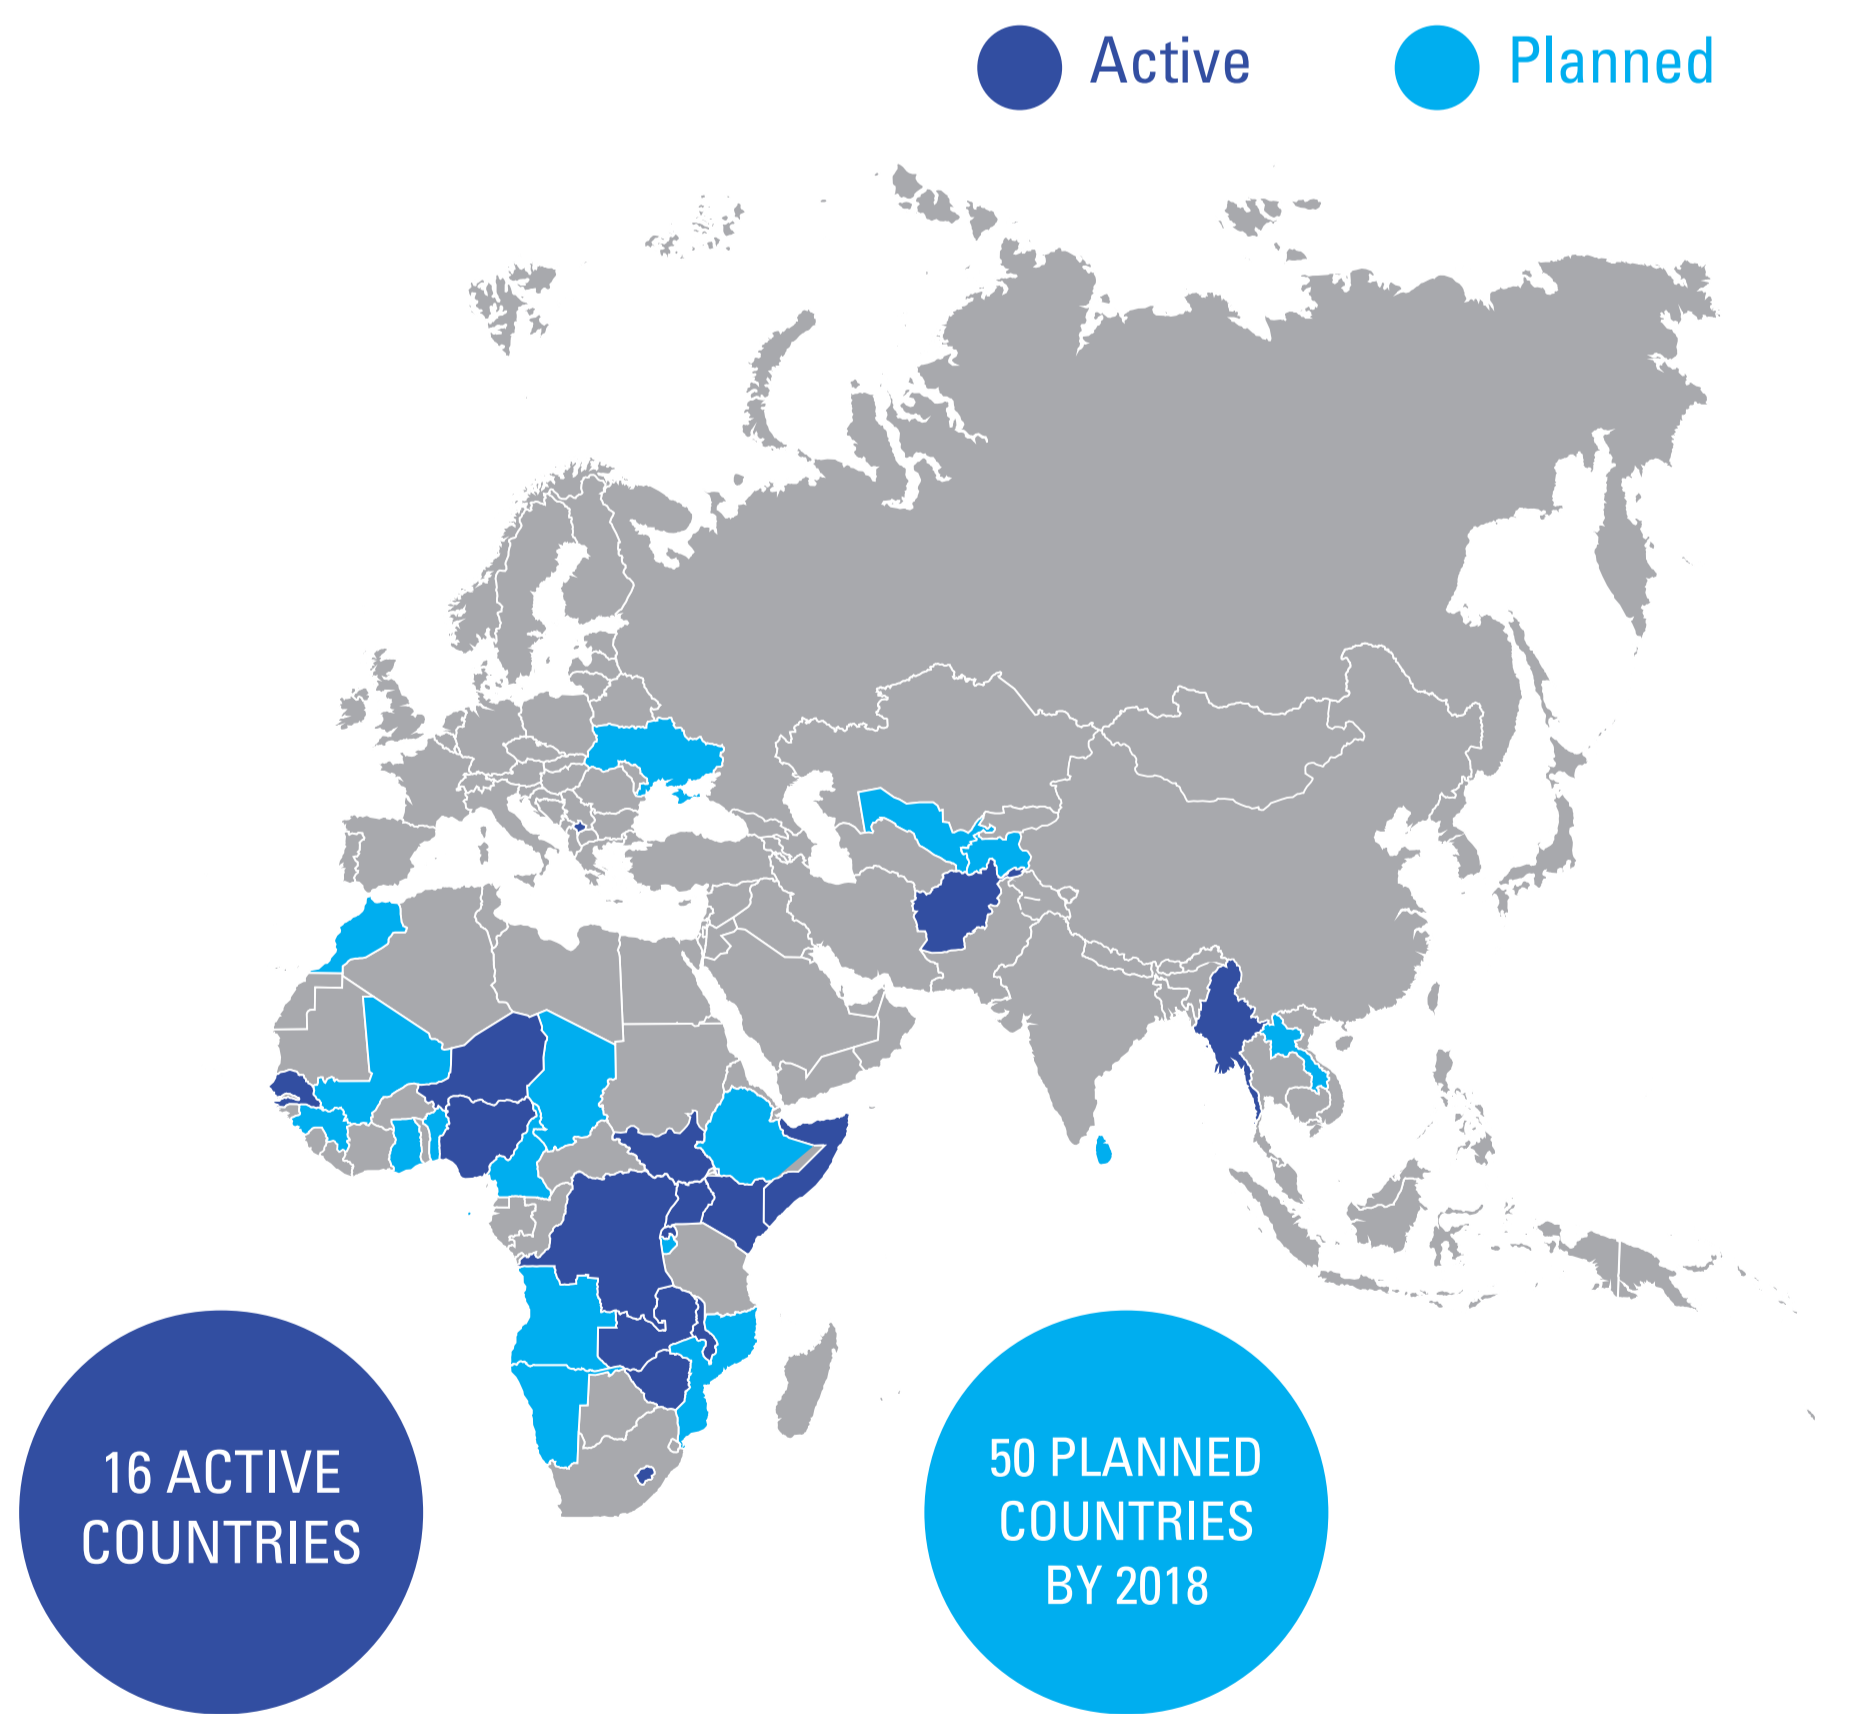

A visualization tool that can help countries to understand the value of using data
